

**Rassemblement du Siècle Citroën Origins,
Presentation made for the residents of La Ferté Vidame and from the Area.**

Dear Friends,

The « Rassemblement du Siècle Citroën Origins » was presented to the residents of La Ferté Vidame and from the whole area through a public meeting organized by the City Council on October 12th, 2018.

About one hundred attendees accepted the invitation.

The objective of this meeting was to introduce them our project to get their adherence, to involve them and to engage them.

Mr Bernard Planque, mayor of La Ferté Vidame open the session highlighting the motivation and presenting all the advantages for the City and the Community to welcome such exceptional event as « the Meeting of the Century » to celebrate the 100 years of Citroën.

It was followed by a detailed presentation of the event (45 min) by par Jean-Christophe Copin, engineer of the Event. Numerous questions were raised showing the high interest of the attendance.

We have noticed the high motivation of the population to actively participate in the event through the volunteering in different activities (accommodation, assembling & dismantling, creation of ecological furniture...)

In order to maintain the contact with all volunteers, a register was opened listing all proposals.

The meeting ended with a friendly drink offered by the City Council of La Ferté Vidame.
